CHROME PLATED EJECTORS AND
COMPETITION CHOKE TUBE SYSTEM

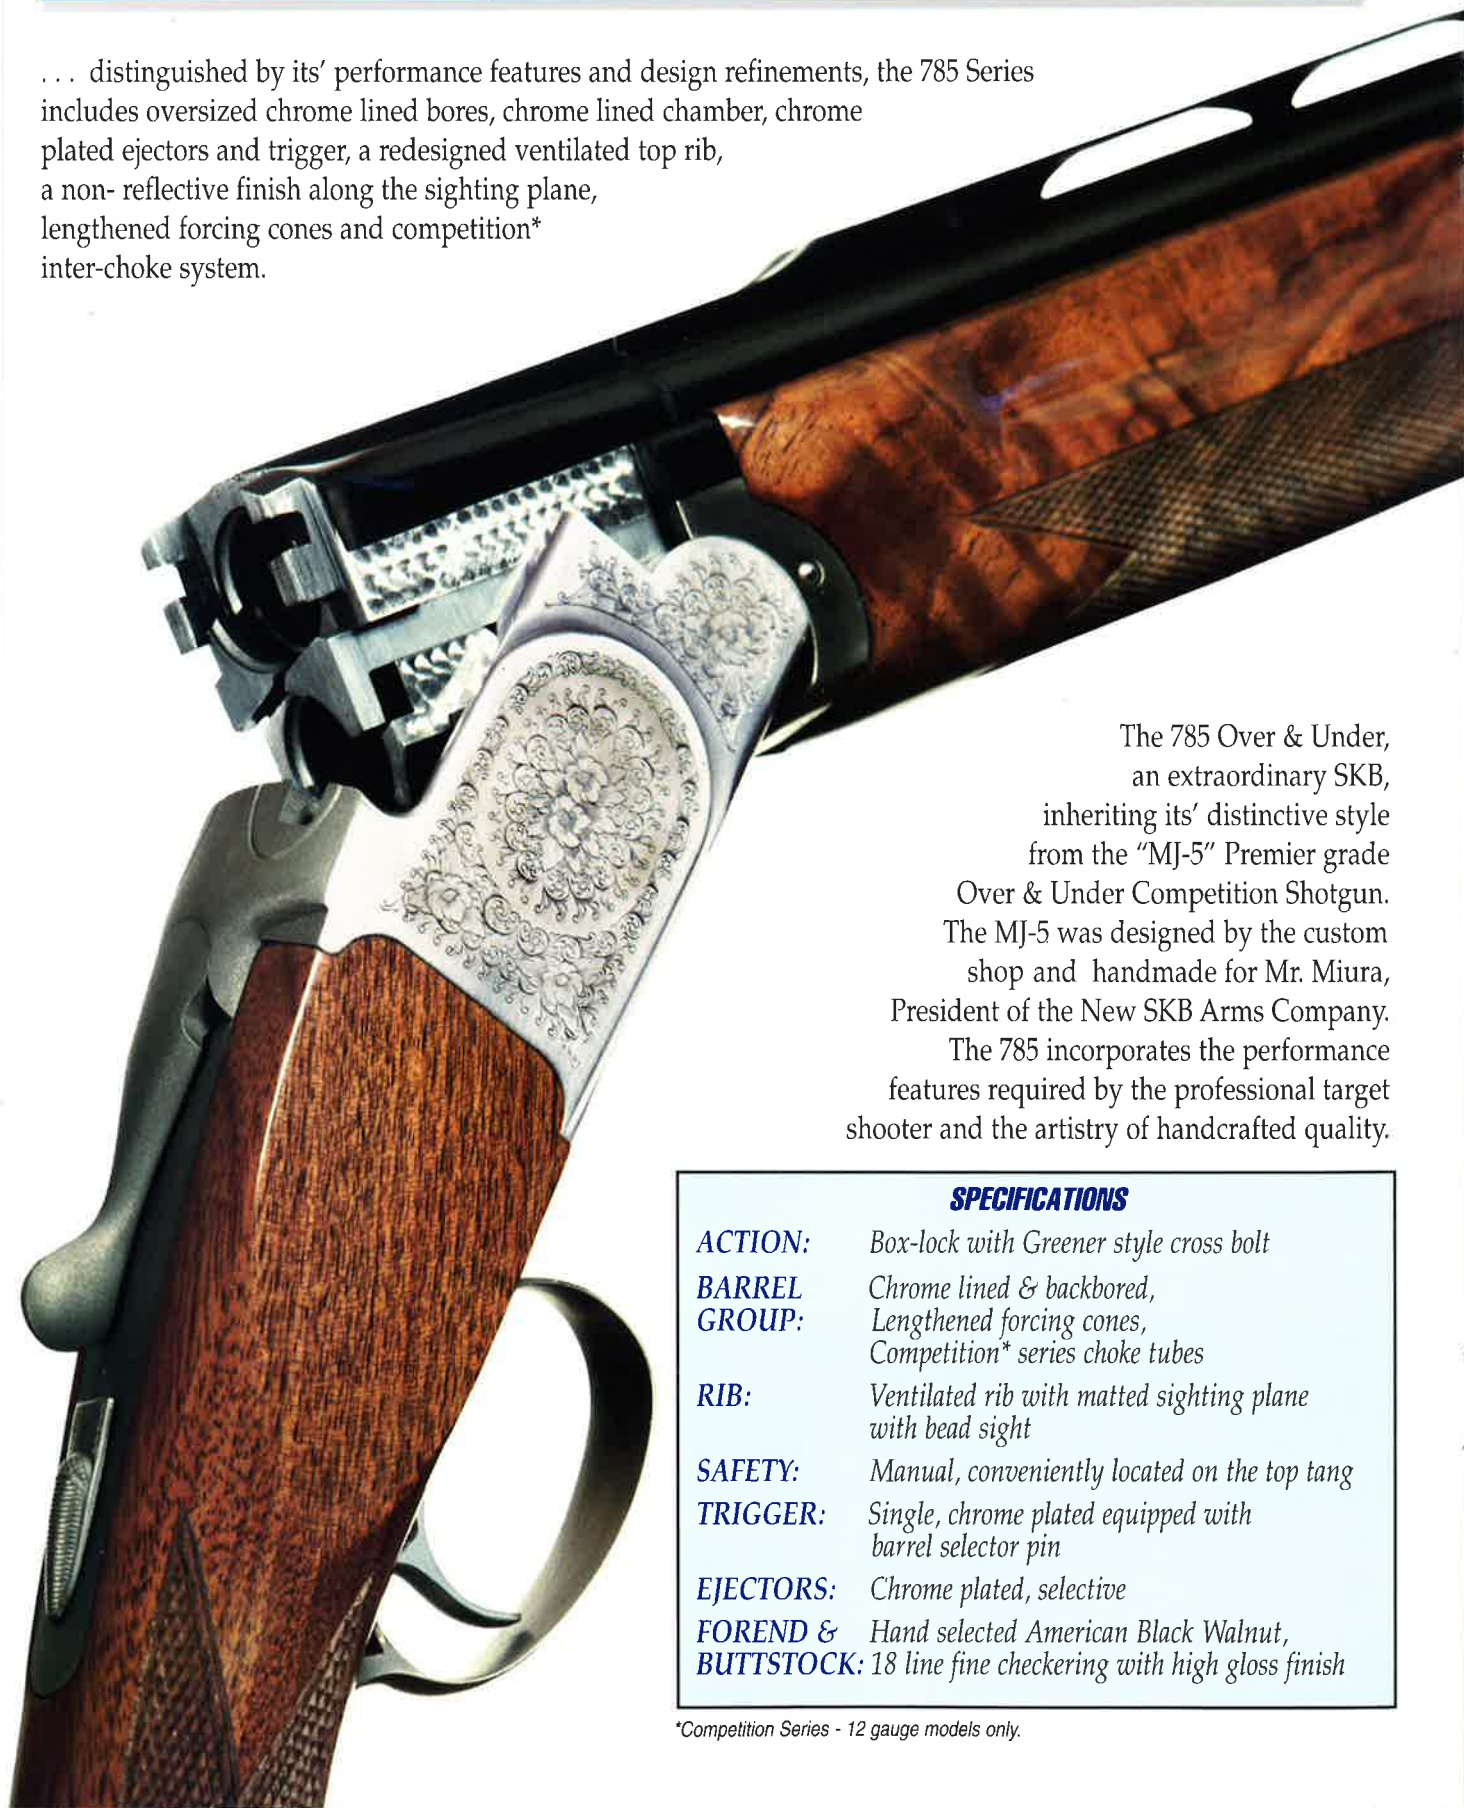

SKB SHOTGUNS

SINCE 1855

INTRODUCING

THE "785" SERIES . . .

. . . distinguished by its' performance features and design refinements, the 785 Series includes oversized chrome lined bores, chrome lined chamber, chrome plated ejectors and trigger, a redesigned ventilated top rib, a non-reflective finish along the sighting plane, lengthened forcing cones and competition* inter-choke system.

The 785 Over & Under, an extraordinary SKB, inheriting its' distinctive style from the "MJ-5" Premier grade Over & Under Competition Shotgun. The MJ-5 was designed by the custom shop and handmade for Mr. Miura, President of the New SKB Arms Company. The 785 incorporates the performance features required by the professional target shooter and the artistry of handcrafted quality.

SPECIFICATIONS

ACTION:	Box-lock with Greener style cross bolt
BARREL GROUP:	Chrome lined & backbored, Lengthened forcing cones, Competition* series choke tubes
RIB:	Ventilated rib with matted sighting plane with bead sight
SAFETY:	Manual, conveniently located on the top tang
TRIGGER:	Single, chrome plated equipped with barrel selector pin
EJECTORS:	Chrome plated, selective
FOREND & BUTTSTOCK:	Hand selected American Black Walnut, 18 line fine checkering with high gloss finish

*Competition Series - 12 gauge models only.

The 785's low profile receiver is sleek and elegant. The receiver is finely engraved with a scroll pattern and finished with a silver nitride plating. Its' design incorporates a Greener type cross bolt locking system which engages two monobloc lugs in the breech of the receiver for strength, durability and positive alignment. The barrel group is constructed utilizing a monobloc. This allows the chrome lined, backbored barrels to be fitted and precisely aligned to the sighting plane. The barrels are fitted with SKB's INTER-CHOKE system; either the 12 gauge competition series or the 20 & 28 gauge standard series. The chrome plated ejectors are selective in that they automatically throw the fired shell from the chamber, while the unfired shell is only slightly lifted for easy removal. The barrels on the 12 & 20 gauge models are equipped with ventilated side ribs for improved heat dissipation. The chrome plated trigger is equipped with a barrel selector button for simple and dependable switchover. The 12 & 20 gauge models are equipped with inertial trigger systems. The 28 & 410 gauge models and also the 3 Barrel Skeet Sets utilize a mechanical trigger system.

The top portion of the receiver has been bead blasted to a matte grey finish, along with the manual safety and top lever to reduce glare along the sighting plane. The height, shape and texture of the ventilated rib all contribute to the effectiveness of the shotgun and the shooters ability to quickly pick-up and acquire the target. SKB's are known for their pointability; that natural instinctive feel of a shouldered over & under. This is attributed to the overall weight distribution, and a properly dimensioned stock for correct alignment to the sighting plane. The semi-beavertail forend and pistol grip buttstock are hand selected from fancy American Black Walnut, then finished to a high gloss for richness and lasting durability. The stock and forend are hand fitted to insure precise wood to metal contact. The distinctive fine line checkering insures a positive grip and quick handling in any shooting situation. The NEW 785's are manufactured with an ATTITUDE!
QUALITY, INNOVATION AND AFFORDABILITY.

**NEW BEAVERTAIL FOREND
FOR 785 SERIES**

ALSO INTRODUCING . . . THE "WATERFOWLER" . . .

. . . featuring a distinctly different and proud new look for SKB. The receiver and barrel assembly are prepared by a bead blasting process. This produces a metal surface with a satiny, non-glare appearance. Then, the receiver is plated with highly durable silver nitride and the barrel assembly blued, resulting in an attractive, yet functional finish.

The "WATERFOWLER" was designed for steel shot and the inclement conditions of waterfowl hunting. Factory performance tuned with chrome lined backbored barrels and lengthened forcing cones, chrome lined chamber, and chrome plated ejectors, along with the competition series choke tube system. (Specification on page 10).

**NEW . . . MATTE FINISH BARRELS & RECEIVER

FIELD & FIELD SETS

785

Featuring: **CHROME LINED BORES**
CHROME LINED CHAMBERS
CHROME PLATED EJECTORS

The new 785 series inherits its distinctive styling, engraving and finish from SKB's "MJ - 5" premium grade competition over & under. The "MJ - 5" was designed and handmade specifically for Mr. Miura, the president of the NEW SKB ARMS COMPANY, a distinguished shooter in his own right. This beautiful design incorporates the performance features required by a professional target shooter and the artistry of handcrafted quality found only in the premium grade shotguns.

NOTE: 785's Are Equipped With Step-Up Style Ribs

The Field and Field Sets are designed to provide the hunter with a well balanced, fast shouldering shotgun. The guns are dimensioned for consistent point and swing control, and are chambered in 12, 20, 28, & 410 gauge. Our standard features include: a finely engraved low profile receiver, Greener cross-bolt, box lock action, manual safety conveniently located on the top tang, single selective trigger, and selective automatic ejectors. Each shotgun is fitted with a sculpted pistol grip stock & forend, finished to a high gloss for richness and lasting durability.

The 785 & 585 series 12 gauge models feature an oversized .735 diameter bore, lengthened forcing cones, and the competition series inter-choke system. These performance features greatly enhance the overall effectiveness of the shotgun by reducing shot pellet deformation, reducing perceived recoil, and by producing more uniform pellet patterns.

The SKB receivers are milled from a solid block of steel by a multi-head Hitachi robotic machine tool. This state-of-the-art equipment insures precise tolerance in critical components.

✓ CH/STP - Center Channelled, Semi Wide Step Up Rib

SW - Semi Wide Step Up Rib

585 SERIES RIB OPTIONS SEMI-WIDE OR TRADITIONAL

The 585 Series Sporting Clay is now available with your choice of ventilated rib styles. Both are equipped with a nickel center bead and a white front bead providing a guide for quick target acquisition along a broad sighting surface. The "TRADITIONAL" narrow rib features a 3/8" (9.5mm) wide step up target style rib with a flat matte finish. The "SEMI-WIDE" CHanneled" rib features a 15/32" (12mm) wide step up target style rib with center channel and matte finished outer edges.

Sporting Clays is a challenge to every sportsman who has ever shot a course; where targets move in every conceivable direction. Mastering this sport requires more than concentration and instinct. It requires a shotgun with responsive fit, balance and a fast sighting plane.

As with our entire line of SKB shotguns, the Sporting Clay models are available in two grades; the 785 and 585, with barrel lengths of 28, 30, and 32 inches. The SKB Sporting Clay Shotgun features a low profile receiver, a stepped target style rib, a radiused recoil pad and a special sporting clay stock dimensioned for the competitive edge.

Practice. Practice. Practice. . . are the requirements of being a successful Sporting Clays shooter and field hunter alike. The SKB Sporting Clays Over & Under gives the sportsman the advantage of having a shotgun equipped with 3" chambers. This allows the shooter to practice hunting style shots on the sporting clays course with 2 3/4" target loads developing a comfortable and instinctive style of shooting. These skills are easily taken to the field with the same shotgun using heavier 3" field loads. That's the beauty of the 3" chambered SKB Sporting Clay Over & Under, particularly the 585 "narrow rib" version. The ventilated rib is shaped just like the Field Over & Under, and designed to get on target fast.

Each SKB reflects the traditions and pride of workmanship of the master gunsmith.

THE 785 SERIES VENTILATED RIB

The sighting plane is a re-designed high profile rib with larger trussel type posts, a semi-wide (12mm) top surface, with center channels and matte finished outer edges.

TRAP & TRAP COMBO'S

The SKB line of Over & Under Trap Guns has evolved over many years of effort to provide the serious trap shooter with an affordable shotgun that considers weight, balance, fit, feel and trigger pull. Trap Combo's feature a set of over & under barrels and a single over barrel that utilizes an interchangeable forend. These combinations are available in both the 585 and 785 grade, with a choice of three barrel length configurations and a choice of either a Standard trap stock or a Monte Carlo trap stock.

SKEET & 3 BBL SETS

785

Featuring: CHROME PLATED BORES
CHROME PLATED CHAMBERS
CHROME PLATED EJECTORS

585

The SKB Skeet Over & Unders have been favorites on the range for many years and are available in both the 585 and 785 series. Our competition guns give the shooter the confidence and a solid sense of balance when . . . *"breakin' clays is all that matters".*

Our standard features include low profile receiver with a box-lock action, manual safety, single selective trigger, automatic ejectors, a matte sighting plane equipped with a nickel center post and white front bead. All Skeet style buttstocks, regardless of gauge, are fitted with a radius butt pad for a fast sure mount. The 12 gauge models are performance tuned which includes oversized diameter bores (.735 approx.), lengthened forcing cones and the competition series choke tube system.

Consistency in weight, balance and feel are trademarks of the SKB 3-Barrel Set. The set is available in 20, 28 & 410 gauge in both the 585 and 785 series. Each barrel set is furnished with its' own forend, and all fit precisely to the same action. An airline approved fitted aluminum case is inc investment.

WATERFOWLER

CHROME: BORES, CHAMBERS AND EJECTORS

The NEW WATERFOWLER features a distinctly different and proud new look for SKB. The receiver and barrel assembly are prepared by a bead blasting process. This produces a metal surface with a satiny, non-glare appearance. Then, the receiver is plated with highly durable silver nitride and the barrel assembly blued, resulting in an attractive, yet functional finish. The stock and forend have an oil finish to reduce glare.

585 YOUTH & LADIES

Final assembly requires many years of skill and judgement, to insure that all parts have proper fit, alignment, engagement and timing.

The new "Youth and Ladies" model 585 Field takes into consideration the shorter arm reach of these individuals by featuring a shorter length of pull of 13 1/2 inches. This new stock dimension gives these shooters a natural quick pointing fit and is well balanced for good swing control. The 12 gauge models incorporate all the '85 series standard features: oversize bores, lengthened forcing cones and competition series choke tubes.
