In 1966, SKB Arms Company exported their first Over & Under to America, which was marketed and distributed by Ithaca Arms Company. Since that time, American hunters have appreciated the hand crafted quality of of SKB Over & Under shotguns. Fielded now for over forty years, SKB's Over & Under models have become woven into the fabric of the American hunting community. SKB continues to lives up to their reputation as a premier line of shotguns, worthy of becoming family heirlooms, passed from generation to generation.

With over 150 years of precision gun making, SKB takes great pride in its reputation of hand crafted quality. The experienced hands that polish bores, mill receivers, checker stocks, and precisely fit metal to metal and wood to metal are the pillars of this fine craftsmanship.

This commitment to quality, reliability and value is ever present in the newest models from SKB. Our new Target model shotguns continue to evolve and improve, embracing higher standards of reliability, to meet the high expectations of our customers.

Our commitment to quality, reliability, and customer service are the attributes that distinguish SKB Shotguns from other shotgun manufactures. We are pleased to present the heirloom of the next generation - the GC7 Series shotgun.

# GAME SERIES

GC7 Game Series Grade III

GC7 Game Series Grade II

GC7 Game Series Grade I

Multi-gauge Set

The GC7 Game series shotguns provides hunters with a well balanced, fast shouldering field shotgun. The low profile GC7 receiver, back bored barrels (12 gauge only) and sculpted stock are the key and essential components of shooting comfort, quick and responsive handling. Choke selection is also a key element of a successful hunting experience. The Game series shotguns are fitted with the new flush fit Briley F2 series choke tube system. The F2 system provides a wider range of choke constrictions allowing hunters the ability to select a pellet pattern to match the hunting environment.

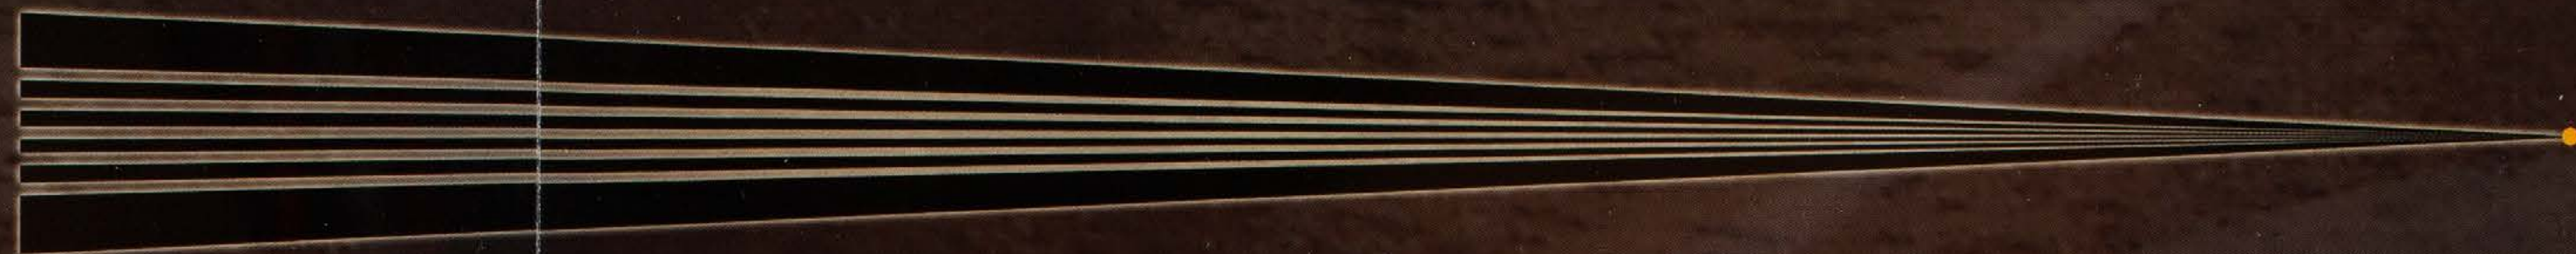

The new GC7 Game models are available in three grades in a choice of 12, 20, 28 or 410 gauge. Multi-gauge field sets are available in three configurations; 12 & 20, 20 & 28 or 28 & 410. The Game series is also offered in a reduced length of pull in either 12 or 20 gauge. Game model specification charts are shown on page 17.

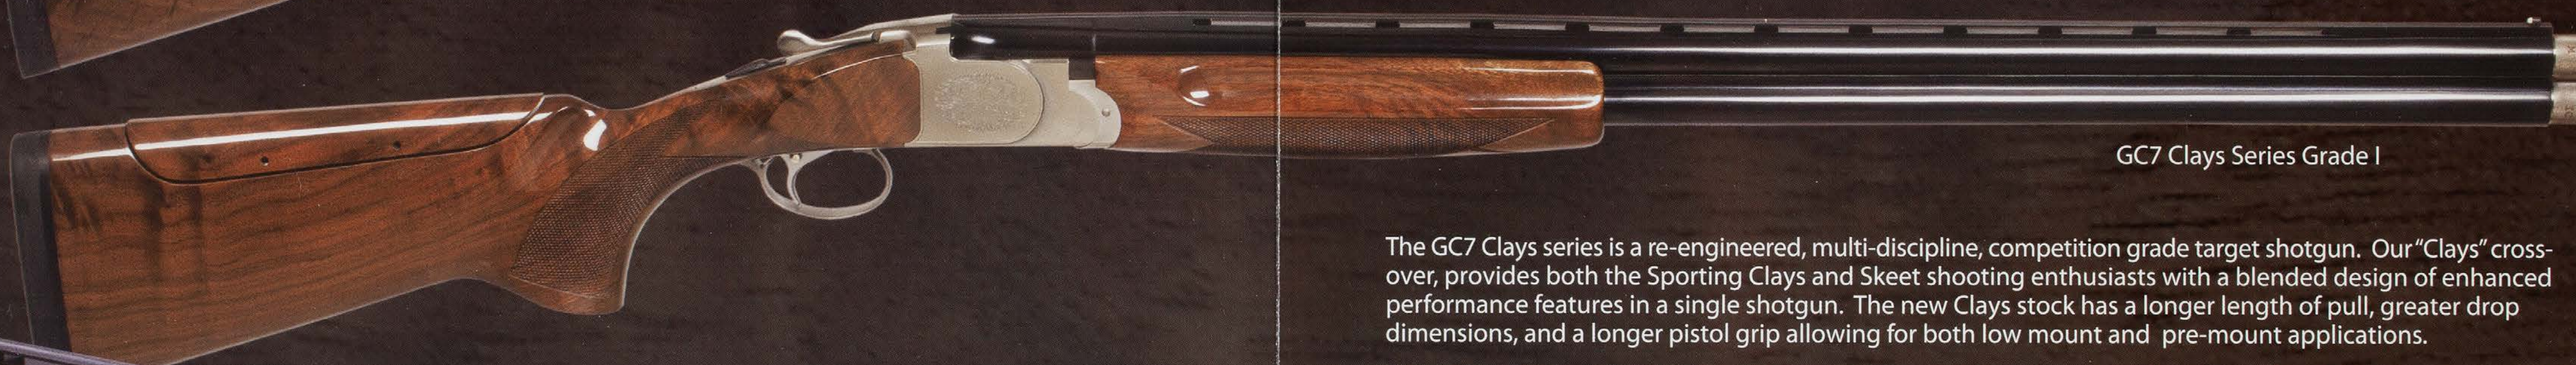

# CLAYS

GC7 Clays Series Grade III

GC7 Clays Series Grade I

Fixed width center channel rib is a standard feature on Grade I and all small gauge models.

The GC7 Clays series is a re-engineered, multi-discipline, competition grade target shotgun. Our "Clays" cross-over, provides both the Sporting Clays and Skeet shooting enthusiasts with a blended design of enhanced performance features in a single shotgun. The new Clays stock has a longer length of pull, greater drop dimensions, and a longer pistol grip allowing for both low mount and pre-mount applications.

The narrower top ventilated rib or tapered top ventilated rib reduces barrel weight while improving target acquisition speed. This dimension change also improves the dynamic balance and responsiveness of the shotgun. The Clays series shotguns are fitted with Briley X2 extended choke tubes. The X2 system provides a wider range of choke constrictions allowing shooters to select a pattern to match the target presentation.

The new GC7 Clays models are available in three grades in a choice of 12, 20, 28 or 410 gauge. Multi-gauge sets are available in two and three barrel configurations. The Clays series is also offered in both fixed and adjustable comb models. Specification charts are shown on page 17.

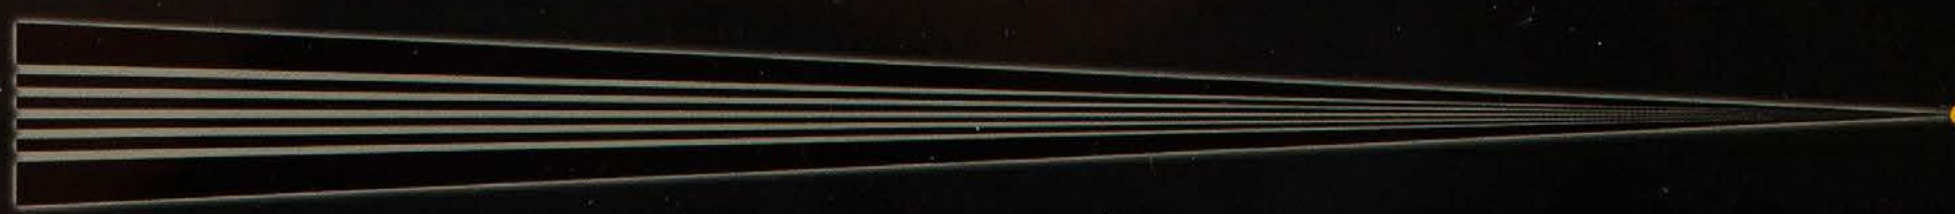

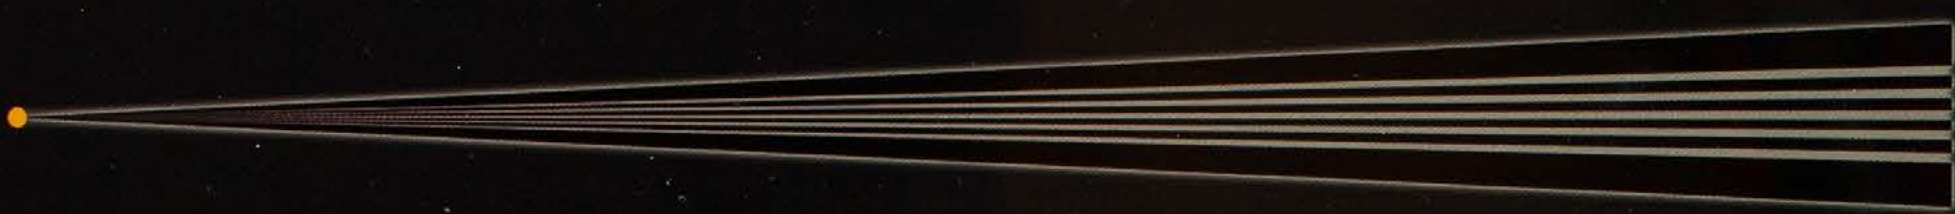

Tapered 9.5 to 7.0 mm matte surface top rib and ventilated side ribs are standard features on Grade II and Grade III 12 ga. models.

GC7 Clays Multi-gauge sets are available with fixed or adjustable comb stocks in either 28" or 30" barrel lengths.

85TTR High Grade Combo

85TTR Standard Grade Un-Single

The CTS Adjustable Comb System allows for both height and offset adjustments. The base plates are etched with 1/16" indicating lines for precise left or right alignment of the comb. Comb height is adjusted by sliding 1/16" nylon washers over the support posts.

The 85TTR tournament stock is available in either Monte Carlo or Trap standard version, and available in either cast off or cast on configuration. The forward sweeping pistol grip aligns the shooters wrist with the stock enhancing the shooters ability to swing and control the shotgun. The new Pachmayr XLT pad reduces both felt recoil and shooter fatigue.

The 85TTR is the next generation of performance tuned competition Trap guns from SKB, and are available in three base configurations, Over & Under, Unsingle or Combination. The 85TTR features 12 to 9mm tapered ribs on chrome lined barrels. The tapered rib provides an enhanced perspective allowing for faster target acquisition, while improving the shotguns' dynamic balance point for more responsive handling. Specification charts are shown on page 18.

The 85TTR Unsingle barrel is equipped with an adjustable rib that allows you to change the point of impact to match your style of shooting. The rib can be adjusted without special tools. Simply loosen one slotted screw with the choke tube wrench, then rotate the small knurled wheel in the muzzle support block to move the point of impact either up or down. Then retighten the slotted screw.

From the factory, the Unsingle is set to shoot approximately 65/35 or approximately 4" above the point of aim. The point of impact can be adjusted from 50/50 to 90/10 by simply rotating the wheel to change the angle of the rib.

The 85TTR barrel group has been fitted with a nickel center post and the HI-VIZ Comp Sight system. This sight allows the shooter to select the size and color Litepipe to meet the individual's ocular variation and lighting conditions of the event. The Litepipe is an optical-quality plastic, injection molded to precise dimension and color. A specific Litepipe kit has been selected to match the barrel configuration of each 85TTR model.

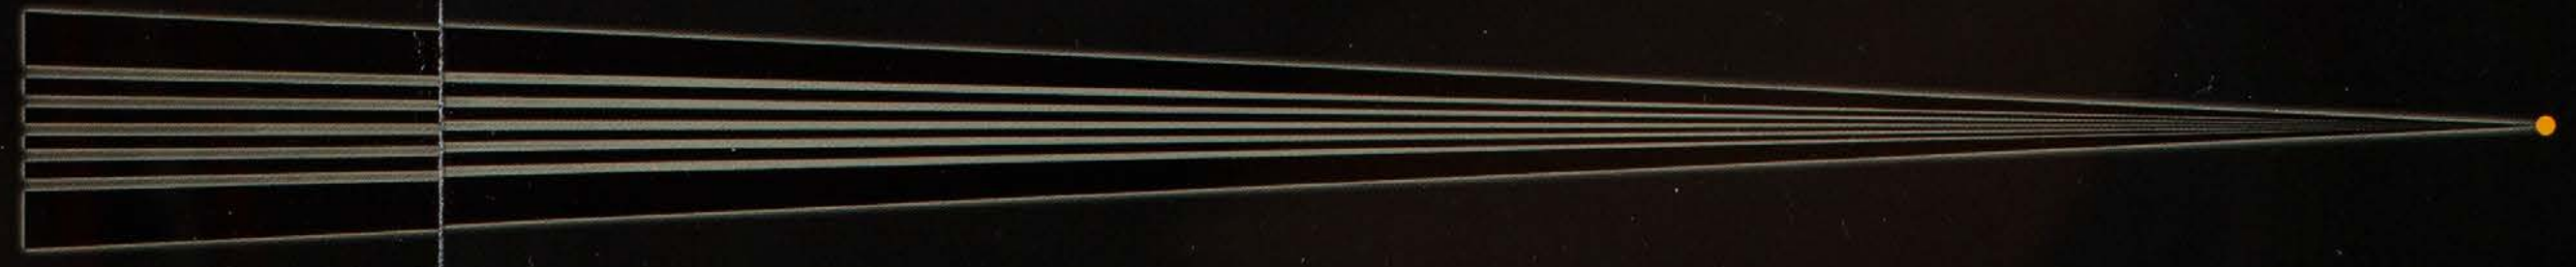

Litepipe selection for O/U and Unsingle shown below. Litepipe selection for Combo's include 4-Red, 4-Green, and 1-White.

# TRAP MODELS

GC7 Top Single Grade I

GC7 Top Single Grade I

The new GC7 Top Single is a specialized Trap shotgun for singles and handicap events from pad to muzzle. The GC7 is constructed from performance based components and design features that will require the serious target shooter to give SKB due consideration. The Top Single features a tapered top ventilated rib, back-bored barrel with lengthened forcing cone, three Briley X2 extended chokes and a Graco adjustable comb stock fitted with a Pachmayr super soft XLT pad.

The 32" model Top Single is fitted with a 13.5" length of pull stock with adjustable comb and is available in either Monte Carlo or Trap Standard.

The 34" model Top Single is fitted with a 14 5/8" length of pull stock with adjustable comb and is available in either Monte Carlo or Trap Standard.

Graco 350 hardware, standard on all Grade I Clays and Trap adjustable comb models.

GC7 Trap Combo Grade III

Limited production quantities of the GC7 Grade II and III will be available in two base configurations, Unsingle or Unsingle & Over/Under combination. These models will features 12 to 9mm tapered ribs on all barrels, Briley X2 extended choke tubes specification charts are shown on page 18.

Tapered Adjustable Rib

Point Of Impact 50/50 to 90/10

# SELECT AMERICAN BLACK WALNUT

GC7 Grade I fitted with Grade II / III – Select

GC7 Grade II fitted with Grade III / IV – Deluxe

GC7 Grade III fitted with Grade V / VI – Fancy

Hand selected grades of American Black Walnut stocks and forends are tastefully detailed with 18 line diamond cut checkering ensuring a positive grip and beautifully finished with high gloss polyurethane.

A stock's cast is a subtle turning of the stock, directing the recoil away from the shooter's face and aligning the pad into the shoulder pocket. Cast of a stock is the distance measured right or left from the center line of the rib extending back over the stock. A right hand or cast off stock measures 0-3mm at the heel of the pad and 3-6mm at the toe of the pad to the right of the center line. A left hand or cast on stock measures 0-3mm at the heel of the pad and 3-6mm at the toe of the pad to the left of the center line.

The stock's **length of pull (LOP)** gives consideration to the general size of the shooter, and the forward or rearward placement of the shooter's cheek on the comb of the stock.

The **drop at comb (DAC)** and **heel (DAH)** is the distance measured from an imaginary horizontal line extending back from the sighting plane of the shotgun. When the shooter's cheek is resting on the comb, these dimensions affect the alignment of the shooter's eye either above or below the horizontal line of the sighting plane.

The thickness of the comb and the cast of the stock's comb determine the left or right positioning of the shooter's eye relative to the center line of the sighting plane. The "Cast at the Toe" shifts the butt pad position to conform with the muscular structure of the chest and shoulder. The radius of the pistol grip and the **length of the trigger pull (LOTP)** determines the positioning of the shooter's hand, affecting both control and comfort.

STOCK STYLE	COMB TYPE	LENGTH OF PULL LOP	DROP AT COMB DAC	Pistol Grip Radius LOPT	DROP AT MC DAM	DROP AT HEEL DAH	PACHMAYR PAD TYPE	PAD SIZE

Std Youth	Adjustable	13 1/2"	1 11/16"	3 1/2"	N/A	2"	XLT	1.0"

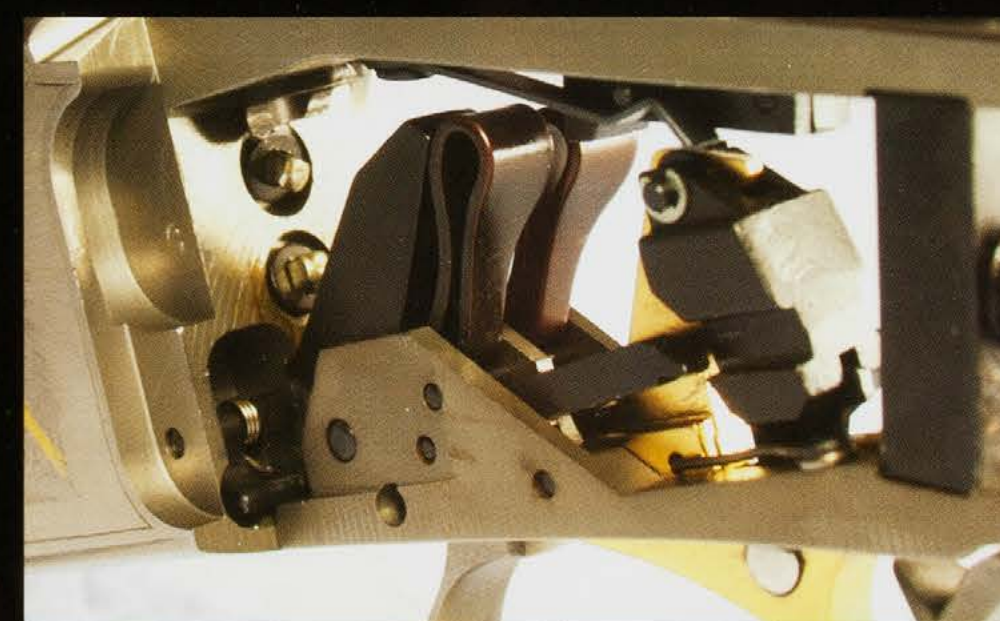

Note: Small gauge Game models are fitted with a plastic butt plate.

The SKB **receiver** is produced in two sizes; a standard frame for 12 gauge models, and a smaller frame for all 20, 28, and 410 gauge models. The receiver is cut from a forged steel ingot by computerized CNC machines to precise dimensions measured in thousandths of an inch. The final result is a low profile box lock receiver utilizing a modified "Greener" style crossbolt locking mechanism inletted at the top of the receiver. The strength of this design ensures that your SKB is capable of providing a lifetime of shooting enjoyment. The receiver is hand polished and enhanced with a rolled engraving pattern. It is then protected by a silver nitride finish applied in super heated conditions that provides a corrosion resistant surface.

The **monobloc** is also cut from a forged steel ingot by computerized CNC machines to similar precise dimensions. The monobloc contains 2 locking lugs which engage the crossbolt, 2 integral shoulder lugs and a base lug which interlocks with the receiver as the action is closed. This combination forms one of the strongest actions on the market. The barrel tubes are seated and soldered into the monobloc to ensure the correct point of impact of both the top and bottom barrel.

Each side of the monobloc is precisely cut for a single piece ejector and the pivot seat. The finished barrel group rotates at the pivot seat on two trunnions mounted through the sides of the receiver. After years of use, the SKB action can be easily re-tightened if need be, ensuring that your shotgun maintains a tight fit for many more years of service.

The **trigger** system has undergone several improvements to reduce engagement creep, pull weight, sear let off, and over-travel. These refinements all contribute to producing a smooth crisp tournament trigger.

Performance, reliability, and longevity have also been significantly improved with new spring designs. Normal cocking and firing sequences in a shotgun cause cyclic fatigue and stress in springs. Engineers utilizing new computer aided three dimensional analysis of spring shape, material alloys, micro-hardness, and spring energy were able to significantly reduce the affects of cyclic fatigue in the hammer springs, sear springs, and cocking shoe springs.

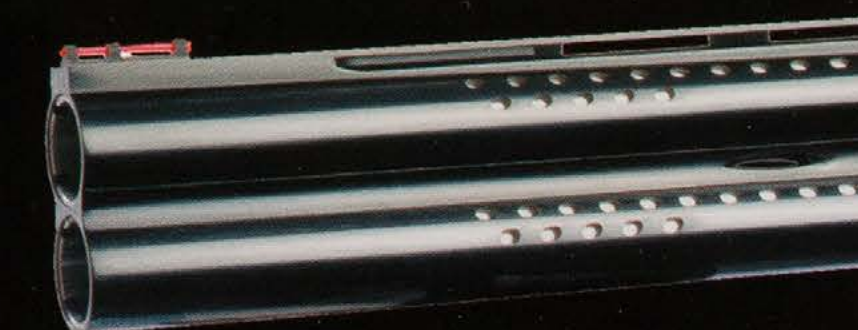

The resulting design changes in these springs have doubled the life expectancy and reliability of the tournament trigger system.

**OPTIONAL  
PIGEON PORTING**

**NOW AVAILABLE  
12 GA. TARGET MODELS**

High strength chromium alloy steel barrels are produced using a hammer forging process. This process ensures consistent wall diameter and trueness over the entire length of the barrel. The concentricity and mirror finish of the barrel is accomplished by polishing through a series of vertically mounted honing rods. The barrels are mounted in a fixture which lifts and lowers them vertically 16 feet while the spinning honing rods polish the barrels to a mirror finish of consistent diameter. This process reduces pellet deformation and produces more uniform pellet patterns.

The SKB barrel group (12ga) is available with "Pigeon Porting" by Mag-Na-Port International. This porting process is accomplished by Electrical Discharge Machining (EDM), ensuring smooth incisions of exact dimensions. The "Pigeon Porting pattern" reduces perceived recoil by 15 to 20%, and muzzle lift by 60 to 80% in 12 gauge models.

**Mesh Hull Bag**  
(MHB-0)

**Mesh Hull Bag with Shell Box Holder**  
(MHB-1)

**Mesh Hull Bag with Two Shell Box Holders**  
(MHB-2)

Our Mesh Hull Bags are fitted with two heavy duty belt clips. The snap spring top closure and zipper bottom allows for easy loading and unloading.

**Divided Shell Pouch with Belt**  
(RLB-D)

**Reloaders Bag**  
(RLB-1)

**Reloaders Bag with Two Shell Box Holders**  
(RLB-2)

The Shell Box Holder and Reloaders Bags are fitted with two heavy duty belt clips. The Reloaders Bags also have a 2" web belt and zipper bottoms for easy unloading.

**Choke Tube Case**  
(CTZC)

The Choke Tube Zipper Case includes 6 plastic vials with caps which are sized to fit the longer extended SKB choke tube. The case includes a small zipper pocket for a choke tube wrench. The case has two belt loops sized to fit a 2" web belt and a D ring snap.

**Protective Counter Pad**  
(12" x 48")  
(PAD)

**Range Bag**  
(12 x 7 x 11)  
(RB-M)

**Range Bag**  
(12 x 7 x 8)  
(RB-S)

The Range Bags main compartment holds shell boxes and other large shooting accessories. The bag is fitted with 4 outer pockets for additional accessories and a water bottle holder. The bag has a detachable shoulder strap and a padded carrying handle.

**Lithium Gun Grease**  
(LGG-10cc)

**Shotgun Case 49" fits up to 30" barrel** (GC-49)  
**Shotgun Case 51" fits up to 32" barrel** (GC-51)  
**Shotgun Case 53" fits up to 34" barrel** (GC-53)

Our Gun Case is constructed from heavy duty 600 Denier nylon and is backed with high density foam padding. The interior is lined with a soft velveteen cloth to protect your shotgun. A large full length zipper and large padded muzzle cap allows for easy access. The case also features two accessory pockets, adjustable shoulder strap and padded handles.

**SKB "Exploding Target" Hat**  
The rolled crown, 6-panel hat is a cotton twill, washed polo with a velcro adjustable strap.

**SKB GC7 Logo Hat**  
Rolled crown, 6-panel hat, washed cotton twill, wafer bill, 3-D SKB logo embroidered, with a velcro adjustable strap.

**150th Anniversary Hat**  
Rolled crown, 6-panel hat, washed cotton twill, wafer bill, 3-D SKB logo embroidered, with a velcro adjustable strap.

**Shooting Vest**

The SKB Deluxe Nylon Mesh shooting vest features full length quilted shoulder pad with an interior pocket for additional padding. Adjustable waist straps insure a comfortable fit. Other shooting vest features include rear hull pocket with zipper, pocketed reshoot loops and front bellow pockets.

Available in sizes: L, XL, 2XL, 3XL

# GEAR

Magnetic Rib Site is available in three sizes and includes 4 interchangeable Litepipes.

Comp Site Kit replaces any SKB front site, includes base, mounting screws, carrying case, key and 8 Litepipes.

Spark Sight fits all SKB Field Models. Available in Red or Green (6/48 thread)

For a complete listing of specific models each site fits, visit our web site at [www.skbshotguns.com](http://www.skbshotguns.com)

## SHELL BOX CARRIER

RETAIL PRICE \$14.95

- 1200 DENIER NYLON
- 2 ELASTIC RE-SHOOT LOOPS
- FITS STANDARD BOX OF 25 - 2 3/4 GA. SHELLS

- REINFORCED BACK PLATE FITTED WITH 2 HEAVY DUTY METAL CLIPS FOR SECURE ATTACHMENT TO YOUR BELT

Buy one - Special Price	\$7.50 each
Buy three - ten	\$6.50 each
Buy eleven - or more	\$5.50 each

**CALL FOR SHIPPING AND HANDLING**

Photocopies of coupon are excepted.

## T-SHIRT'S

ALL T-SHIRT'S COME WITH LARGE BACK PRINT AND A SMALL LEFT CHEST PRINT

LARGE BACK PRINT SHOWN BELOW ON GRAY T-SHIRT'S

LEFT FRONT CHEST PRINT SHOWN BELOW ON BLACK T-SHIRT'S

**SKB Logo T-Shirt**

100% cotton. Available in Black, White, or Gray  
Size: M, L, XL, 2XL, 3XL

**150th Anniversary T-Shirt**

100% cotton. Available in Black, White, or Gray.  
Size: M, L, XL, 2XL, 3XL

**85TSS Logo T-Shirt**

100% cotton. Available in Black, White, or Gray.  
Size: M, L, XL, 2XL, 3XL

**SPARTA GC7 T-Shirt**

100% cotton. Available in Black.  
Size: M, L, XL, 2XL, 3XL

**SPARTA GC7 TRAP T-Shirt**

100% cotton. Available in Stone Wash Gray.  
Size: M, L, XL, 2XL, 3XL

**Shooting Glasses Blinders**  
(BLINDER)

**28 oz. Sports Bottle**  
(SB)
